Overview "Projects"

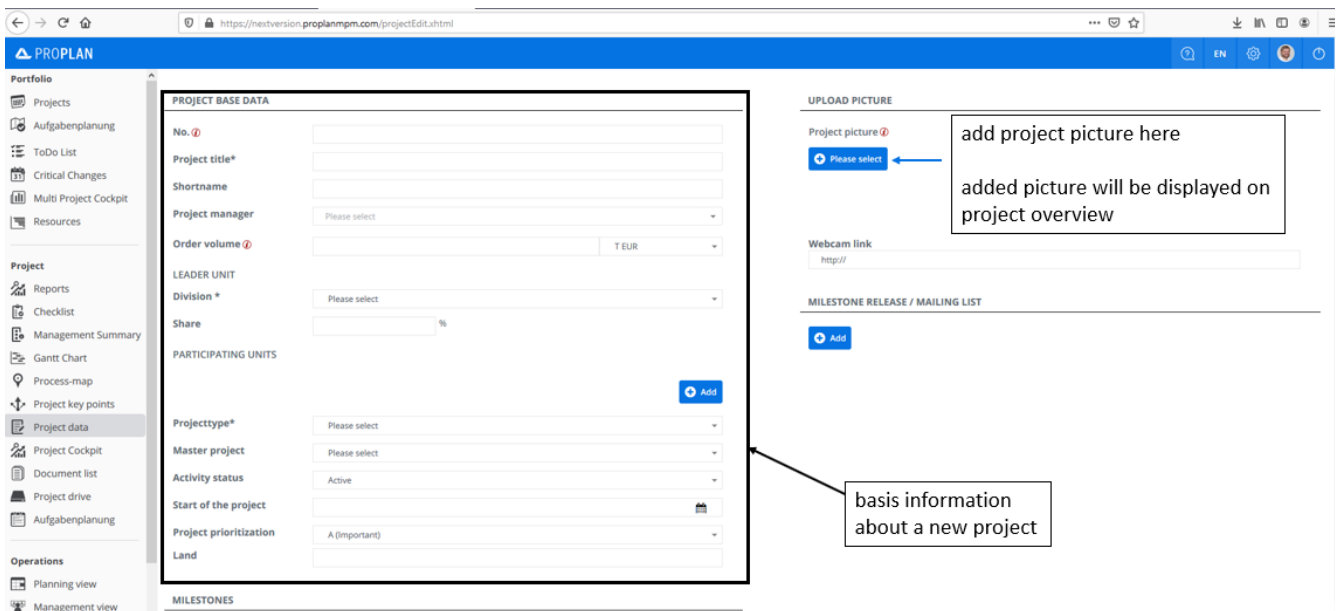

After signup, the user will be directed to an overview page. This page displays all active projects that are in the database. All projects are sorted by the overall project status. This view allows you to select a specific project by clicking on the project name. To create a new project you just have to click the "New Project" button. You can also use different types of filters in this view.

PROPLAN-Admin and Projectmanager+ have the facility to create a project.

The creation of projects takes place from the header "Projects". The most important information about the project will be entered here.

Once the mandatory fields have been specified, the project has been saved and set to active, it can be found in the project list.

Select your project team

The selection of a project team is also possible in the "project header". Here the roles can be added to different people. (e. g. production manager)

The screenshot shows the PROPLAN web application interface. The left sidebar contains navigation options for Portfolio, Project, and Operations. The main content area displays the 'PROJECT TEAM' table. A callout box with an arrow points to the 'WRITE PRIVILEGE' column for the 'Acquisition leader' role, with the text 'selection of a project team'.

ROLE	NAME	PARTICIPATION IN TEAM MEETINGS (TEAM MEMBER)	WRITE PRIVILEGE	LIMITED WRITE PRIVILEGE
